CRAFTS

Swedish Weaving

Instructor - Cathy Moussette

Swedish Weaving is a special form of decorative embroidery, also known as huck weaving, where the designs are usually geometric in nature and worked primarily along the surface of the cloth rather than going through the cloth. This fabric (monk's cloth) has a surface with raised threads that form squares allowing designs to be symmetrical. A blunt needle is used to weave yarn or floss into beautiful patterns. All materials will be furnished for this four-session class. Participants age 16+ welcome. **Class size limited to 10.**

****Monday, October 10 Keeping Track of Passwords**

A good password is easy to remember, but difficult to guess, both for people who know you, and for anonymous password-crackers. We all have so many different passwords to keep track of nowadays—rather than taking the dangerous shortcuts of either using the same password for everything, or else writing passwords down and keeping them near your computer, this course will teach you tips to make it easier to create unique, memorable passwords for every different application. You will learn how to create good passwords, and what tools can help you store your passwords safely.

****Wednesday, October 26 Keeping in Touch with Family/Friends on Facebook**

If you only join one social network, Facebook is the one. Facebook is the largest social media network, a great place to keep in touch with family and friends wherever they live. In this class we will be discussing how to sign up and sign in, navigating Facebook, finding Facebook friends, reading the news feed, and posting status updates to your friends.
